

## Cluster Munition Stockpiles of Signatories to the Convention on Cluster Munitions

A total of 87 countries possessed stockpiles of cluster munitions at some point in time.

- 38 of these countries so far have signed the Convention on Cluster Munitions.<sup>1</sup>
- Signatories **Australia, Honduras, Iraq, Mali, and Spain**, and non-signatory **Argentina** once had stockpiles, but do not currently possess cluster munitions.
- **Spain** completed the destruction of its stockpile of 4,724 cluster munitions, containing 223,261 submunitions, in March 2009. It was the first to do so since signing the convention. It is retaining 836 cluster munitions, containing 28,615 submunitions, for training and countermeasures testing purposes, as permitted under Article 3 of the treaty.
- Of the 33 signatories with stockpiles, destruction activity is underway in at least 11: **Belgium, Canada, Colombia, France, Germany, Moldova, the Netherlands, Norway, Portugal, Switzerland, and the United Kingdom.**

12 signatory states have provided information about the types and quantities of cluster munitions in their stockpiles. Collectively, these 12 states have stockpiled at least 662,000 cluster munitions containing more than 144 million submunitions:

<b>Germany</b> (50 million)	<b>Belgium</b> (10 million)	<b>Slovenia</b> (53,000)
